

In the Claims:

1. (Amended) A breathable, elastic film comprising:

54 B
B2/A
a blended or compounded material comprising a high performance elastomer and a low performance elastomer, said low performance elastomer filled with a plurality of particles suitable for forming pores in said film upon stretch-thinning of said film, said film having been stretch-thinned, whereby a low performance elastomer portion of said film forms a plurality of micropores.

58. (Amended) A diaper comprising:

172
a fluid pervious cover sheet, a fluid impervious backsheet and an absorbent layer disposed between said fluid impervious cover sheet and said fluid impervious backsheet, at least one of said fluid pervious cover sheet, said fluid impervious backsheet, and said absorbent layer comprising an elastic film comprising a blend of a high performance elastomer and a low performance elastomer, said blend filled with a plurality of particles suitable for forming pores in said film upon stretch-thinning of said film, said film having been stretch-thinned, whereby a low performance elastomer portion of said film forms a plurality of micropores.
